Stecklingsfarm.ch GmbH has an average production capacity of 25'000 - 30'000 CBD clones per week. We also produce CBD flowers, naturally from our own clones. Indoors, we produce about 3 tons of premium CBD flowers per year, at the highest, consistent quality and according to GMP guidelines (Good Manufacturing Practice).

We are also active in Italy and cultivate fields with our own CBD clones. There, the harvest volume amounts to about 10 - 12 tons of premium CBD flowers per year. Here, too, production is carried out according to the highest quality standards and standardized processes.

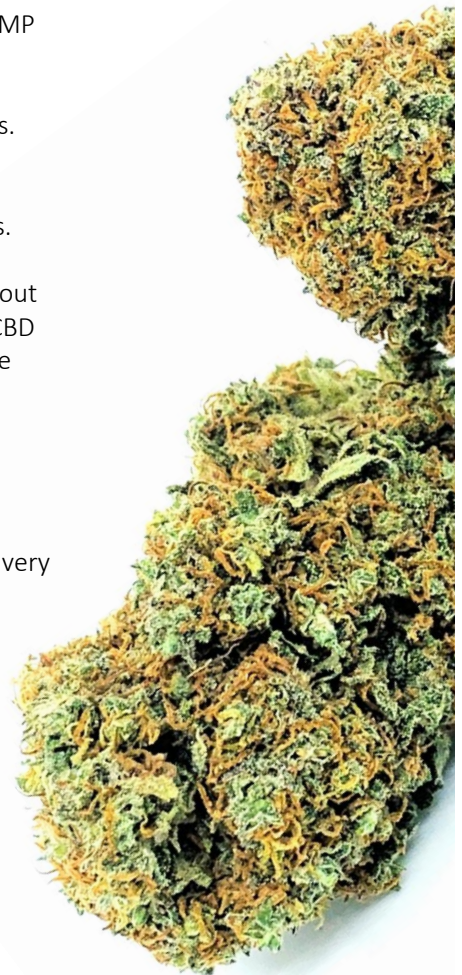

We are also careful to work towards the best possible quality throughout the entire value chain, which of course includes drying our premium CBD flowers gently and slowly on the stem, packaging it in the best possible way and storing it properly until delivery.

Of course, we work without herbicides, fungicides or insecticides. Our premium CBD flowers are also free of tobacco.

Despite our well - established and efficient production processes, it is very important that we continuously critically question our processes and improve them if necessary.

We have the entire value chain in our own hands. From the clones to the sale and can therefore guarantee the best quality from the beginning to the sale.

Stecklingsfarm.ch GmbH. Quality, from the clone to the flower.
